

WIR SYS 91V

SOUNDPLUS® TWO-CHANNEL INFRARED SYSTEM

[POWERFUL IR TECHNOLOGY ... NO RACK SPACE NEEDED!]

NEW The NEW WIR SYS 91V infrared listening system ensures direct, clear delivery of your message without sacrificing security. The TX90 two-channel IR transmitter combines modulator and emitter technology into a single operating unit, which reduces operating cost, eliminates the need for rack space and eases set-up. Resistant to high-efficiency lighting interference. Up to 28,000 sq ft (2,600 sq m)

coverage in single-channel operation with WIR RX22-4N receivers. (Coverage area can be easily increased by connecting additional TX9 emitters.) This system features our stylish, **NEW** WIR RX15-2 headset-style, infrared receivers. Wall/ceiling omnidirectional mount is included. Stand kit is available for portable operation. Transmitter is also available in white.
